Performance quoted represents past performance and does not guarantee future results. Investment return and principal value will fluctuate, so an investor's shares may be worth more or less than the original cost when sold. Market price returns are based on the bid/ask midpoint at 4:00 p.m. ET (when NAV is normally determined) and may differ from your returns if you traded shares at other times. Index performance does not reflect fees or expenses. Indexes are unmanaged and cannot be invested in directly. Current performance may be higher or lower than performance quoted. *Diversification does not ensure a profit or guarantee against a loss.¹30-Day SEC Yield is a standard yield calculation developed by the Securities and Exchange Commission (SEC) that facilitates fairer comparisons of funds. The figure reflects dividends and interest earned by the securities held by the fund during the most recent 30-day period, net of fund's expenses.²12-Month Yield represents the sum of the fund's dividends for the last 12 months divided by the sum of the last month's NAV and any capital gain distributions made over the past 12 months.³Holdings are subject to change.⁴Sum of weightings may not equal 100% due to rounding.

Carefully consider the investment objectives, risks, charges and expenses of ProShares before investing. This material must be preceded or accompanied by the current fund prospectus. Read it carefully before investing.

Investing involves risk, including the possible loss of principal. This ProShares ETF is non-diversified and entails certain risks, which may include risks associated with the use of derivatives (such as swap agreements, futures contracts and similar instruments), imperfect benchmark correlation, leverage and market price variance, all of which can increase volatility and decrease performance. Investments in the consumer discretionary and retailing industries are subject to risks such as changes in domestic and international economies, interest rates, competition and consumer confidence; disposable household income; consumer tastes and preferences; intense competition; changing demographics; marketing and public perception; and dependence on third-party suppliers and distribution systems. Investments in smaller companies typically exhibit higher volatility. The fund invests in international investments, which may involve risks from: geographic concentration, differences in valuation and valuation times, unfavorable fluctuations in currency, differences in generally accepted accounting principles, and from economic or political instability. In emerging markets, many risks are heightened, and lower trading volumes may occur. Please see the summary and full prospectuses for a more complete description of risks. **There is no guarantee any ProShares ETF will achieve its investment objective.**

Shares of any ETF are generally bought and sold at market price (not NAV) and are not individually redeemed from the fund. Brokerage commissions will reduce returns. ProShares are distributed by SEI Investments Distribution Co., which is not affiliated with the fund's advisor.
